TITLE	South Carolina Technical Education System. Program Evaluation Report (Based on the 1993-94 Academic Year).
INSTITUTION	South Carolina State Board for Technical and Comprehensive Education, Columbia.
PUB DATE	1996-04-00
NOTE	249p.; For the 1994-95 report, see JC 970 442.
PUB TYPE	Numerical/Quantitative Data (110) -- Reports - Descriptive (141)
EDRS PRICE	MF01/PC10 Plus Postage.
DESCRIPTORS	College Graduates; *Degrees (Academic); *Education Work Relationship; Enrollment Rate; Followup Studies; *Outcomes of Education; Program Effectiveness; Program Evaluation; *Program Termination; Technical Institutes; Two Year Colleges; Vocational Followup
IDENTIFIERS	*South Carolina Technical College System

ABSTRACT

Prepared by the South Carolina Technical Education System in compliance with state policies on program review, this 1993-94 annual report presents findings on diploma program productivity in terms of enrollment, number of graduates, the percent of graduates placed in related jobs or continuing their studies full-time, and the continuation or discontinuation of programs. Following an introduction and description of program evaluation guidelines, data tables are presented on the following topics: program status (i.e., probation, suspension, or canceled) by level, cluster, and college; programs placed on probation, suspended, or canceled during 1993-94; programs not subject to evaluation; and graduates by level, cluster, and college. The report then presents exhibits for each of the System's 16 colleges, showing graduation and placement outcomes, and provides systemwide graduate and placement data. Highlighted findings include the following: (1) of the 842 programs reviewed, 82.5% were in good standing, 7% were placed on probation or continued on probation, 3.6% were suspended or continued on suspension, and 6.5% were canceled; (2) the total number of graduates in all programs for 1994 was 7,629, including 4,565 receiving associate degrees, 1,186 receiving diplomas, and 1,871 receiving certificates; and (3) 95% of all graduates were available for employment, while 83% of these were employed in jobs related to their studies and/or continuing their education. REPORT TO THE
STATE BOARD FOR TECHNICAL AND COMPREHENSIVE EDUCATION
PROGRAM EVALUATION YEAR 1993-94

INTRODUCTION

Program evaluation continues to be both a positive and a practical activity which allows the individual colleges and the system to examine programs in terms of productivity, job availability of graduates, and placement of graduates. The policies and procedures allow for programs to be phased out when new technology or changing economic conditions render them obsolete. This flexibility allows the colleges and the system to reset priorities and reallocate resources to insure effective delivery of instruction to meet the most pressing needs of the technical colleges and the employers and students they serve.

The staff members in the Division of Instruction of the State Board for Technical and Comprehensive Education are responsible for managing the reporting procedures for annual program evaluation, reviewing the actions taken by the sixteen colleges, and reporting the results to the State Board for Technical and Comprehensive Education. They are also responsible for reporting the information on all associate degree programs to the Commission on Higher Education.

BACKGROUND

In June 1977, the State Board for Technical and Comprehensive Education (SBTCE) established a policy which requires the colleges in the Technical Education System to annually review and report the status of all approved programs to the Executive Director. Procedures for conducting the annual program review were developed by the Chief Instructional Officers at the colleges and approved by the College Presidents and the Education Committee of the State Board for Technical and Comprehensive Education. The procedures were tested during the 1977-78 reporting year and were revised in 1978-79 and again in 1982-83. In 1983 the criteria and standards governing the associate degree program in General Technology were revised to require only the job placement criterion and standard. In 1992, the General Technology program's purpose was revised as a result of a recommendation from the Commission on Higher Education on the 1991-92 Program Evaluation Report.

Each college is required to report degree and diploma program productivity in terms of enrollment, number of graduates, and the percent of graduates placed on related jobs or continuing their studies full-time. For programs which do not meet established criteria and standards, college officials must determine whether the programs shall be continued or discontinued. The colleges must provide justifications to the Executive

Director's staff for continuing programs which do not meet the minimum productivity standards.

State Board policy 3-1-101 as revised on January 27, 1988, authorizes the awarding of certificates (Types A and B). The procedures for certificate evaluation were formulated and approved on October 10, 1988. Certificates are evaluated annually based on the productivity standards as outlined in the procedures.

DEFINITION OF TERMS

An approved program may be a certificate, diploma, or degree. Certificates are approved at the Local Area Commission level, diplomas are approved at the Local Area Commission and SBTCE levels, and degrees are approved by the Local Area Commission, SBTCE, and the South Carolina Commission on Higher Education.

PROGRAM EVALUATION GUIDELINES

Program productivity is measured in quantitative terms -- enrollment, number of graduates, and job placement. All colleges in the Technical Education System are required annually to evaluate and report to the SBTCE the status of all approved degree, diploma, and certificate programs.

Degrees and Diplomas

All degree and diploma programs are subject to review and evaluation once they have graduated three classes.

An approved diploma or degree program is subject to annual review and evaluation based on the following minimum criteria and standards.

1. Number of Graduates

   Each diploma or degree program must produce six graduates during the evaluation year or an average of six graduates over the most recent three-year period.

2. Program Enrollment

   Each diploma program must have enrolled 12 students who generated 9 full-time equivalents (FTEs) in the most recent fall semester. Each associate degree program must have enrolled 16 students who generated 12 FTEs in the most recent fall semester.

3. Job Placement

Fifty percent (50%) of the graduates of a diploma or a degree program available for job placement must be placed on a job related to their education or continuing their education on a full-time basis.

Graduates who are deceased, disabled, or not actively seeking employment are excluded from the job placement criterion.

All programs which meet or exceed the minimum criteria and standards receive a good status.

Degree and diploma programs subject to review which do not meet one or more of the minimum productivity standards must be further scrutinized to determine if they should be continued or canceled. Specific justification must be provided for continuing a program when it fails to meet one or more of the minimum productivity standards.

When a program fails to meet one or more of the minimum productivity standards and there is no justification to continue the program, the program is placed on probation. A program may continue on a probationary status for a period of three consecutive years. After a program has been on probation for the three consecutive years, the program is placed on a suspended status unless justification is provided to allow for an extended probationary period.

A degree or diploma program may continue on a suspended status for a period of three years. If there is no justification to reinstate the program during that period, the program is canceled.

To reactivate a canceled program, the college must submit a new program proposal to the SBTCE and in the case of an associate degree program, the college must submit a new program proposal to the South Carolina Commission on Higher Education.

For programs which have been suspended or canceled, the college must discontinue recruiting and enrolling new students, make arrangements in the best interests of faculty affected, remove the programs from all college and public relations documents, and inform all affected parties including students of the suspended or canceled status of the program.

The following are exceptions for degree and diploma programs:

1. Associate in Arts and Associate in Science degree statistics are reported separately by the colleges but are combined by SBTCE staff for determining minimum productivity criteria and standards.

2. The Associate in Occupational Technology with a major in Vocational-Technical Education is excluded from all program evaluation criteria.

3. The Associate in Occupational Technology with a major in General Technology is subject to evaluation, but the only criterion is that fifty percent (50%) of the graduates available must be employed or continuing their studies full-time in a related field. Technical concentrations for General Technology majors must also be reported.

   In accordance with the recommendation from the Commission on Higher Education on the 1992 Program Evaluation Report, the General Technology program's purpose and operations were revised jointly by CHE staff, SBTCE staff, and technical college representatives. The patterns of enrollment and graduation for this program must be reviewed again in five years.

4. The Associate in Engineering Technology with a major in General Engineering Technology is subject to evaluation, but the only criterion is that fifty percent (50%) of the graduates available must be employed or continuing their studies full-time in a related field.

5. A diploma which has a "parent" degree program can be termed a "stop-out" and is evaluated as "good-stop-out," even though the diploma may not meet the minimum criteria and standards. However, if the "parent" program is suspended or canceled, the diploma program becomes a "stand-alone" and cannot receive a status of "good-stop-out."

Certificates

Certificate programs are evaluated only if graduates of the programs are produced. If no graduates are produced, and if there is no enrollment in the program, it is maintained in an inactive status. Certificate programs subject to evaluation and review must meet the following minimum criterion and standard.

Job Placement

Fifty percent (50%) of the graduates available for placement must be placed on jobs related to the program of study or continuing their education.

Certificate programs subject to review which do not meet the minimum productivity standard must be further scrutinized to determine if they should be continued. Specific justification must also be provided for continuing a certificate program when one fails to meet the minimum productivity standard.

If a program does not meet the minimum productivity standard of placing fifty percent of the graduates available for placement on jobs related to the area of study, the program is placed on probation for one year. If the certificate program on probation does not meet the minimum productivity standard during the next evaluation year, the program is suspended and can no longer accept new students.

If a certificate program is on a suspended status and the college wishes to justify continuing the program, then justification is required based on documented local job needs for the graduates.

Suspended certificate programs are canceled after one year in a suspended category. However, a college may elect to cancel a certificate program at any time provided there are no students enrolled in the program.

If a certificate program does not enroll students for two consecutive evaluation years, the program is canceled unless the college indicates that it wishes to retain the program.

Supplementary Written Reports

Supplementary written program evaluation reports are required for the General Technology major, diploma stop-outs, and other programs which do not meet minimum standards. In addition, analysis of the program evaluation report may be provided by each college.

SOURCE OF INFORMATION

The Chief Instructional Officer at each college provided the information contained in this report for the respective college.

SUMMARY OF EVALUATION FOR 1993-94

Status of Programs

The Programs were evaluated using Fall 1994 enrollment data and July 1, 1993, through June 30, 1994, graduation and employment data.

During the 1994 Program Evaluation year, there were 842 programs subject to evaluation -- 312 associate degree programs, 140 diploma programs, and 390 certificate programs. Of these 842 degree, diploma and certificate programs subject to evaluation, there were 695 (82.54%) in good standing. Sixty-two (7.36%) were placed on probation or continued on probation; 30 (3.56%) were suspended or were continued on suspension, and 55 (6.53%) were canceled.

Detailed data on summary program status by level, by cluster, and by college are shown in Tables 1-9. The program status summary reports by college and level and by cluster and level are shown in Tables 10 and 11. Program status by college, level, and cluster are shown in Tables 12-27.

Associate Degree Programs

Of the 312 associate degree programs which were evaluated, there were 260 (83.33%) in good standing. There were 13 programs which went from a probation status to a good status. There were 17 (5.45%) of the associate degree programs being placed on probation and 14 (4.49%) continuing on probation. There were 31 (9.94%) programs with a probation status. There were 7 (2.24%) being placed on suspension, 9 (2.88%) continuing on suspension, and 5 (1.6%) being canceled.

Diploma Programs

Of the 140 diploma programs which were evaluated, there were 106 (75.71%) in good standing. There were 4 (2.86%) of the diploma programs being placed on probation, 10 (7.14%) continuing on probation, 4 (2.86%) being placed on suspension, 10 (7.14 %) continuing on suspension, and 6 (4.29%) being canceled.

Certificate Programs

Of the 390 certificate programs which were evaluated, there were 329 (84.36%) in good standing. There were 17 (4.36%) of the certificate programs being placed on probation, and 44 (11.28%) being canceled.

Programs on Probation, Suspension, or Canceled

Table 28 shows that 13 programs which were on probation during 1993 returned to a good status.

Tables 29, 30, and 31 are lists of 17 associate degree programs being placed on probation, 5 programs being extended on probation, and the total of 31 programs on probation.

The 4 diploma programs being placed on probation are shown in Table 32. All diploma programs on probation (14) are shown in Table 33. The 17 certificate programs being placed on probation are shown in Table 35.

The industrial technology programs represent 45 percent of all degree, diploma, and certificate programs on probation; business programs represent 21 percent, engineering technology programs represent 15 percent, health science programs represent 5 percent, computer technology programs represent 6 percent, associate in arts and associate in science programs represent 6 percent, and agriculture programs represent 2 percent.

The 7 associate degree programs being placed on suspension in 1994 are shown in Table 36. Table 37 shows all (16) degree programs on suspension. Table 38 shows 4 diploma programs being placed on suspension, and Table 39 shows all (14) diploma programs on suspension. There were no certificate programs on suspension.

Of those programs on suspension, industrial technology programs represent 70 percent of the 30 suspended degree, diploma, and certificate programs. Engineering technology programs represent 13 percent, business programs represent 10 percent, and health science programs represent 7 percent of all the suspended programs.

The following programs were canceled on the 1993-94 program evaluation report: 5 degree programs, 6 diploma programs and 43 certificate programs. The programs that were canceled are shown in Tables 40, 41, 42, and 43. Of the 54 degree, diploma, and certificate programs canceled, 27 (50%) were industrial programs. Seven (13%) of the 54 programs were business programs, 10 (19%) were engineering technology programs, 3 (6%) were health science programs, and 4 (7%) were public service programs. One (2%) program was canceled in the agriculture cluster, and one (2%) program was canceled in the computer technology cluster. While these programs will no longer appear on colleges' current inventories, they will continue to be included in the Program Evaluation inventory exhibits with a "Canceled 2 or 3" status for subsequent years (summary data are used on graduates for a three-year period).

New associate degree programs with less than three graduating classes are shown with a "Not Subject" status. The 10 associate degree programs which were not subject to evaluation are shown in Table 44. There were 5 diploma programs not subject to

evaluation during the 1993-94 year shown in Table 45. There were 92 certificate programs which had a "Not Subject" to evaluation status in Table 46. If certificate programs do not have graduates and/or enrollment, they are not subject to evaluation.

1992, 1993, 1994 Graduate Summary

Summary data on 1992, 1993, and 1994 graduates by level, by cluster, and by college are shown in Tables 47-55. Graduate summary data by college and level are shown in Table 56, and graduate summary data by cluster and level are shown in Table 57. Graduate summary data by college, cluster, and level are shown in Tables 58-73 for each college.

When comparing 1993 graduate data to 1994 graduate data, total graduates in all categories remained steady in 1994. Total graduates in all programs for 1994 (7,629) increased by .22 percent (17) when compared to the 1993 total graduates (7,612) in all programs. Associate degree graduates for 1994 (4,572) increased by .15 percent (7) when compared to 1993 associate degree graduates (4,565). Diploma graduates for 1994 (1,186) increased by .76 percent (9) when compared to 1993 diploma graduates (1,177). Certificate graduates for 1994 (1,871) increased by only one student when compared to 1993 certificate graduates (1,870).

Graduates as a Percent of Total Enrollments

Table 58 shows total graduates as 16 percent (7,629) of all levels of enrollments (48,039). This represents no change from 1993 which was also 16 percent. For 1994, there were 4,572 associate degree graduates who represented 12 percent of total associate degree headcount enrollment, 38,253 (Table 59). There were 1,186 diploma graduates--29 percent of total diploma headcount enrollment, 4,091 (Table 60). There were 1,871 certificate graduates--33 percent of total certificate headcount enrollment 5,695 (Table 61).

College Exhibits

Exhibits (Exhibits 1-16) for each college show the productivity of all degree, diploma, and certificate programs.

Program Placement for 1993-94

The follow-up data on 7,629 graduates in all associate degree (4,572), diploma (1,186), and certificate (1,871) programs show that 7,262 (95%) were available for employment. Of those 7,262 graduates available for employment, 6,016 (83%) were employed in jobs related to their studies and/or continuing their education. For associate degree graduates, 3,657 (83%) were employed on related jobs or continuing their

education. For diploma graduates, 951 (85%) were employed or continuing their education. For certificate graduates, 1,408 (80%) were employed or continuing their education.

Systemwide detailed graduate, placement, and enrollment data are displayed in Exhibits 17, 18, 19, and 20. Placement data based on those responding to all inquires are provided on each college's 1994 exhibit.

LEGEND

Legend of Abbreviations and Terms Used in this Report

Degrees, Diplomas, and Certificates

Avail =	Graduates available for work or continuing education (Total graduates - total excluded)
Aveg =	Average number of graduates over the last three graduations
Canc1 =	Canceled - program no longer approved or authorized - no students admitted
Canc2 =	Second year canceled -- graduate data being used for summary reports
Canc3 =	Third year canceled -- graduate data being used for summary reports
Clus =	Cluster code
Ex =	Program approved for an extended status; i.e., PROB4EX, PROB5EX
Exld =	Exclusions of graduates who are deceased, disabled, or were not actively seeking employment
FTE =	Full-time equivalent of most recent fall enrollment
Good =	Good standing - meets all criteria and standards
Good-E =	Good standing for certificates; enrollment, but no graduates
Good-J =	When a program status is other than expected, and it has been justified to the State Board for Technical and Comprehensive Education and/or the Commission on Higher Education. When there are exceptions for specific programs in meeting all standards and criteria.
Good-ST =	Good-stop-out - when a diploma program has a "parent" associate degree program even though the diploma does not meet minimum criteria and standards. If the "parent" program is suspended or canceled, the diploma program becomes a "stand-alone" and cannot receive a status of "Good-ST."
Grad 92 =	Graduates for 1992

Grad 93 = Graduates for 1993

Grad 94 = Graduates for 1994

Grads Resp = Total responses from all graduates, including those who have been identified as deceased, disabled, or not actively seeking employment.

Head Cnt = Headcount during the most recent fall semester

In Sch = Number of graduates who continued their education

N-Imp = First year not implemented - approved but no students accepted; N-Imp1, N-Imp2, etc. for subsequent years

N-Sub0 = First fall term of enrollment; not subject to evaluation

N-Sub1 = Not subject to evaluation - first year after implementation

N-Sub2 = Not subject to evaluation - second year after implementation

N-Sub3 = Not subject to evaluation - third year after implementation

N-Appr = Program approval in process

Percnt
Job + School = Total job plus school compared with total available graduates, (Total job + school total available).

Prob1 = First year of probation - does not meet criteria - can accept students

Prob2 = Second year of probation - does not meet criteria - can accept students

Prob3 = Third year of probation - does not meet criteria - can accept students

Susp1 = First Year of suspension - no additional students admitted

Susp2 = Second year of suspension - no additional students admitted

Susp3 = Third year of suspension - no additional students admitted

On Job = Those graduates who are employed in positions related to their program of study.

Total Job + School = Total number of graduates who are employed in positions related to their program of study or continuing their education.

Pct. Grads. Resp = Total number of graduate responses compared with total graduates (Total graduate responses total graduates).

Pct. Resp. Plcd. = Total number of job plus school compared with total respondents less exclusion (Total job + school (Total respondents - exclusions).

Status = Assigned status for program determined by graduates, placement, and enrollment.
